9AM - REGISTRATION

9.30AM - WORKSHOP COMMENCES

4.30PM - WORKSHOP ENDS

An evidence based, drug free treatment for people with mild to moderate dementia. Includes essential training in dementia awareness, activity engagement and iCST Principles.

iCST has shown to be an effective engagement therapy for people experiencing mild to moderate dementia. Purposeful and person-centered activities are provided in a set format providing evidence based results of improved quality of life and better relationship outcomes for those participating.

The therapy provides engagement, enjoyment and a sense of hope that carers can make a difference.

This training is specifically for professionals providing individual care and support and wanting to improve the quality of in home activities and services by delivering a structured program providing positive outcomes and engagement.

Start delivering iCST programs on completion of this exceptional one day training! Package includes a DRTA manual of activities that can be used for iCST sessions.
